Question No. 1

An administrator needs to setup security for a newly installed environment.

Which of the following is a valid step?

- **A.** Remove the default authentication provider.
- **B.** Enable anonymous access for selected users, groups, or roles.
- **C.** Delete the Everyone group to limit access to the environment for selected users, groups, and roles.
- **D.** Add trusted users, groups, or roles to the System Administrators role, and then remove the Everyone group from the role.

Answer: D

Question No. 2

In a multi-server environment, an administrator wants to ensure that items in the Content Manager Cache service are re-validated every thirty seconds.

Which option would accomplish this?

- **A.** Set the memory limit of the Content Manager Cache service to 30000.
- **B.** Set the DISP.contentManagerCacheService.accountInactivityTimer property to 30000.
- **C.** Set the DISP.contentManagerCacheService.cacheValidatorTimetoLive property to 30000.
- **D.** Set the DISP.contentManagerCacheService.cacheValidatorTimetoLinger property to 30000.

Answer: C

Question No. 3

An administrator has configured authentication.

Which statement is true for users logging on to the application?

- **A.** When anonymous access is enabled users cannot log on to a 3rd party authentication provider namespace.
- **B.** Users will be automatically logged off after a defined inactivity timeout period that is set in IBM Cognos Configuration.
- **C.** Although multiple 3rd party authentication provider namespaces are configured, a user can only be logged on to one namespace at a time.
- **D.** After a defined number of failed log on attempts a user will be locked out of their account, which will require intervention through the IBM Administration console.

Answer: B

Question No. 4

A high user load and interactive reporting system on a distributed installation is throwing timeout error messages.

How is this resolved?

- **A.** Increase the JVM heap settings in IBM Cognos Configuration under Services.

- **B.** Edit the install_location/bin CQEConfig.xml and change the DB_Connection_Pool value to 120, save and restart the service.
- **C.** Edit the install_location/webapps/p2pd/WEB-INF/services reportservice.xml and increase the async_wait_timeout_ms, save and restart the service.
- **D.** Increase the number of Report Processes under IBM Cognos Administration on the Status tab under System, set properties to equal 2 times the number of total processor cores.

Answer: C

Question No. 5

Which statement is true when working with datasource credentials?

- **A.** Users can view and delete datasource credentials from the My Data Sets page.
- **B.** Users may be prompted for datasource credentials when they view, run, or open an entry, or when they use a schedule or a job.
- **C.** When determining appropriate access to a datasource, the system first checks the user's profile to see if they have stored their own datasource credentials.
- **D.** If a user wants to create a datasource credentials, the administrator must grant Write permissions for the Manage own datasource signons capability for the user.

Answer: D
