### Question No. 1

An incident response team is responding to a breach of multiple systems that contain PII and PHI. Disclosing the incident to external entities should be based on:

- A. the responder's discretion
- B. the public relations policy
- C. the communication plan
- D. senior management's guidance

**Answer: A**

### Question No. 2

A cybersecurity analyst has access to several threat feeds and wants to organize them while simultaneously comparing intelligence against network traffic.

Which of the following would BEST accomplish this goal?

- A. Continuous integration and deployment
- B. Automation and orchestration
- C. Static and dynamic analysis
- D. Information sharing and analysis

**Answer: B**

### Question No. 3

An analyst wants to identify hosts that are connecting to the external FTP servers and what, if any, passwords are being used. Which of the following commands should the analyst use?

- A. `tcpdump --X dst port 21`
- B. `ftp ftp.server --p 21`
- C. `nmap --o ftp.server --p 21`
- D. `telnet ftp.server 21`

**Answer: A**

### Question No. 4

A critical server was compromised by malware, and all functionality was lost. Backups of this server were taken; however, management believes a logic bomb may have been injected by a rootkit. Which of the following should a security analyst perform to restore functionality quickly?

- A. Work backward, restoring each backup until the server is clean
- B. Restore the previous backup and scan with a live boot anti-malware scanner
- C. Stand up a new server and restore critical data from backups
- D. Offload the critical data to a new server and continue operations

**Answer: C**

### Question No. 5

A security analyst has received information from a third-party intelligence-sharing resource that

indicates employee accounts were breached.

Which of the following is the NEXT step the analyst should take to address the issue?

- **A.** Audit access permissions for all employees to ensure least privilege.
- **B.** Force a password reset for the impacted employees and revoke any tokens.
- **C.** Configure SSO to prevent passwords from going outside the local network.
- **D.** Set up privileged access management to ensure auditing is enabled.

**Answer:** B
